

# ADVANCED EXTERIORS, INC.

## Dave Mehring Residence

# Roofing System # 1

- ❑ Tear off asphalt shingles from 11/12 pitch
- ❑ Re-deck over delaminated plywood with OSB
- ❑ Install 116 SQ of DaVinci Bellaforte Slate system

# Roofing System # 2

- ❑ Tear off Modified Bitumen and EPDM roofing
- ❑ Remove and replace 5 Velux custom skylights
- ❑ Install 14 SQ of Polyglass 2-ply Modified Bitumin

# Safety Considerations

- ❑ Scaffolding setup by stucco crew to safely cutback stucco for roof install
- ❑ Fall protection was used on all 2 & 3 story roof areas up to 11/12 pitch
- ❑ Installation of Eco-Chief Solarhide to achieve class A fire rating and GAF Weather Watch leak barrier
- ❑ Stamped concrete driveway protected by OSB road

# Unique Job Circumstances

- ▣ Installation of 2 different roofing systems
- ▣ 3-story roof areas and very steep slope
- ▣ Installation of 5 Velux custom skylights
- ▣ Coordination with Stucco and Masonry contractors to properly flash headwalls, sidewalls and chimneys

# Headwall & Sidewall Flashings

Before

After

- All About Stucco had to coordinate with roofers before and after install to cutback the stucco and then reskim it.

# Chimney Flashings

Before

After

- Woodward Masonry had to coordinate with roofers before and after install to cutback the stone to be properly install the chimney flashings
